Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 7-9, drawn to a method of coupling a sliding panel assembly, classified in class 49, subclass 506.
- II. Claims 1-6 and 10, drawn to a sliding panel assembly, classified in class 49, subclass 408.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to practice another and materially different process such as attaching an end cap with a receptacle structure of a motor vehicle, then attaching a fixed panel with a movable panel to form a sliding panel assembly, then attaching the sliding panel assembly to the motor vehicle via the receptacle structure.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Sosenko on 1/24/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
